

Description:

Sentry Sprinklers® sprinkler storage cabinets are designed to allow on-site storage for spare sprinklers as per NFPA guidelines. The Cabinets are constructed of red enamel heavy gauge steel enclosure with a hinged cover designed to provide an on-site storage of an emergency supply of sprinkler heads and sprinkler head wrenches.

NFPA requires a representative number of each type of sprinkler head used in a sprinkler system to be stored in a cabinet on-site to allow for immediate removal and replacement of sprinkler that may have operated or become damage

Sprinkler in Building	Min. Number of Spare Sprinklers	NPT Thread Size (in/mm)
Under 300	6	1/2, 3/4 (15, 20)
300 to 1000	12	1/2, 3/4 (15, 20)
Over 1000	24	1/2, 3/4 (15, 20)
