

Description:

Sentry Sprinklers **Model 7300** is a ductile iron, Wafer style, Resilient Seated, Spring loaded Check Valve. The valve allows water to flow in one direction and prevent flow in the opposite direction. The valve has a clear pathway for water to reduce pressure drop and allow maximum flow. The valve is anti-corrosion with 10 mil (250µ) of fusion-bonded epoxy (FBE) coating on both the inside & outside. All other components are made of corrosive resistance material. The valve is suitable for horizontal and/or vertical (upward flow only).
